

# EZ100 EZ Haulr™

Transport virtually any make or model of walk-behind outdoor power equipment with ease on any vehicle with a 2" receiver hitch. The 350# total capacity and adjustable width ramps will safely transport equipment with wheel spacing up to 35" in width and up to 46" front to back.

Designed for convenience and safety, EZ Haulr offers rental customers an easy take home option and commercial users the ability to carry auxiliary equipment on small service vehicles or the rear of multi-machine flatbeds.

Key features include three-piece construction for easy hitch installation, self-storing 6 1/4" wide no-slip ramps, permanent front wheel stops, right hand or left hand ramp use, multiple safety pin locks and durable powder coated finish.

Choose a transport system constructed of rugged steel (EZ100S) or a lightweight steel/aluminum combination (EZ100A). Both come with a two-wheel custom transport and storage cart.

Approximate shipping weight:  
EZ100S 155#; EZ100A 100#.

Includes  
transport and  
storage cart.
