

PL1600 Tow Pro™ 45" High Capacity Turf Aerator

Tow Pro with Utility Vehicle

Tow Pro with All Terrain Vehicle

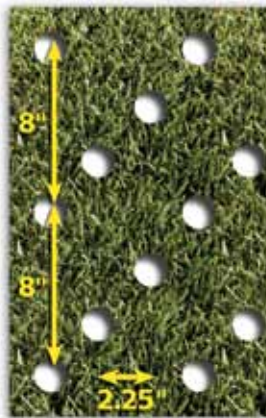

Mow and Aerate in a Single Pass without Dragging Down Mower Power

Now you can achieve Plur results with even greater productivity and reduced operator fatigue. Plur TOW PRO aerates a 45" swath in a single pass. Its unique tongue design allows maneuverability on large, heavily landscaped properties. With capacity up to 84,000 square feet per hour and an operating speed of 3–4 mph, you'll aerate more, aerate better and have energy to spare.

Need to maneuver in tight spots or want to use a tow vehicle wider than TOW PRO? The pivoting tongue offsets 45° in either direction with a quick pull of the lock pin.

TOW PRO is self-contained so it can be operated behind virtually any tow vehicle including riding mowers, ATVs or other small utility vehicles. The electric start 12 HP engine provides aeration power while a 12-volt battery (included) is the power source for the operator control panel.

TOW PRO operation is controlled by a simple operator panel attached to a flexible cable. The universal mount attaches to virtually any tow vehicle for quick and easy operator response. Features include single switch tine disengagement to skip over sprinkler heads without stopping or turning and a transport mode switch to increase ground clearance for loading. Indicator lights will warn you when you are moving too fast or too slow so you get quality aeration at all times.

Pull the Lock Pin to Offset to the Left or Right

Operator Friendly Controls to Raise and Lower

Model Number	PL1600
Aeration Width Per Pass	45"
Approx. Core Spacing	2.25" x 8"
Rated Sq. Ft. Per Hour	Up to 84,000 (approx. 2 acres)
Approx. Operating Speed	3-4 mph
Core Depth	Up to 2.75"
Minimum Gate Width	56"
Number of Tines	16
Engine	Electric Start 12 HP Kohler Command Pro or Equal
Tire Size/Type	13" (h) x 6" (w) Pneumatic
Approx. Operating Weight	720#
