

# EZ100 EZ Haul™ Transport Ramps

Transport virtually any make or model of walk-behind outdoor power equipment with ease on any vehicle with a 2" receiver hitch. The adjustable width ramps, with capacity up to 500#, will safely transport equipment with wheel spacing up to 35" in width and up to 46" front to back.

Designed for convenience and safety, EZ Haul offers rental customers an easy take home option and commercial users the ability to carry auxiliary equipment on small service vehicles or the rear of multi-machine flatbeds. Use for snow blowers, rototillers, mowers or virtually anything on wheels.

Key features include three-piece construction for easy hitch installation, self-storing 6 1/4" wide no-slip ramps, permanent front wheel stops, right hand or left hand ramp use, multiple safety pin locks and durable powder coated finish. Lightweight aluminum ramp assemblies mount safely to a heavy-duty 2" tubular steel receiver hitch extension. Approximate shipping weight: 95#

## GARY MCMILLAN

*Classic Turf Lawn Service, Cincinnati, OH*

**I purchased one of your EZ100 trailer hitch ramp assemblies and it works great! I use it for snow blowers and other equipment, too, and it's always easy on, easy off!**

# PL050 StepSavr™ Sulky

A StepSavr does just what the name implies, significantly reducing crew fatigue and increasing productivity and profits. SourceOne StepSavr mounts behind the PL855 PRO HD aerator and the TS220 TurfSavr. StepSavrs change these units from walk-behind to comfortable and safe ride-behind operation. A special receiver hitch is built into the rear of all current productions (earlier production requires simple five-minute bracket installation) and permits quick release removal when not in use. A unique compound angle swivel knuckle allows maximum maneuverability and stability even on uneven terrain. With a 31" wheel base, 10" pneumatic tires and a stable, non-skid platform, your crew will love the ride. Approximate shipping weight: 50#

Quick Release Receiver Hitch Built Into Every PL855 and TS220 Machine

**Use StepSavr™ with Plugr® PL855 Pro HD Aerator and TS220 TurfSavr™ Renovator**
