

# SL3660 VersaTow™ Slicer

4" Slicing Depth

Move through Narrow Gates

Corners with Ease

Raise and Lower Wings for 36", 48" or 60" Width Operation

Supplemental Weight Trays

Choose PL3660E Electric Lift or PL3660M with Manual Lift (shown)

60 Hardened Steel Knives

Slicer Knife Wheels Swivel for Superior Maneuverability

13" Pneumatic Tires

The SL3660 VersaTow Slicer shares many of the features that have made our VersaTow Aerator a popular choice for big jobs. The variable 36", 48" or 60" operational widths and the ability to tow with virtually any vehicle, plus a telescoping hitch, make this the perfect machine when conditions call for slicing instead of aeration.

Slicer wheel assemblies are spaced 6" on center with each consisting of 6 hardened and sharpened knives so you will get excellent turf maintenance results. The recommended operating speed is up to 5 MPH (175,000 sq. ft. per hour).

Choose SL3660E for unit with 12 volt electrical lift or SL3660M for manual wheel lift.

Want to make your SL3660 dual purpose? Order PL010 VersaTow Aerator Tine Kit to change from slicing to aeration in less than 30 minutes. If you already own a PL3660 Aerator, add slicer capabilities by ordering SL010 VersaTow Slicer Knife Kit.

Add Weights for Tough Soil Conditions

Optional PL010 VersaTow Aerator Tine Kit (Set of 10)
